

Medication Log

Directions: Complete the chart below, listing all medications (prescriptions, over-the-counter, vitamins and supplements) your child takes. If the directions for a medication changes, mark through that row and begin a new row with updated directions. Be sure to bring this sheet with you to all of your child's medical appointments so you can review the information with your child's providers.

F5 - Epilepsy and Seizure Disorders: A Resource Guide for Parents

Start Date	Names of Medications	Dosage	Frequency	What is it used for?	End Date	Comments

This tool was developed from the federal Maternal and Child Health Bureau, Health Resources and Services Administration under grant #198MCO8579, funded to the USC UCEDD, Childrens Hospital Los Angeles through its initiative, Project Access: Improving Care for Children with Epilepsy. Support was also provided by two other partners in Project Access: the National Initiative for Children's Healthcare Quality (NICHQ) under grant #123MCO38893, and the Epilepsy Foundation of America, under grant #U23MCO3909.
