

Fourth Visit Posttest

Patient's name:

Patient's birth date:

Your name and relationship to patient:

Today's date:

Please mark only one answer for each of the following questions:

1. Which organ in your body acts as a filter to remove broken down red blood cells from the blood stream?
 - A. Lungs
 - B. Heart
 - C. Pancreas
 - D. Spleen

2. Anemia is defined as:
 - A. Sickle cell disease
 - B. Pain in the arms or legs
 - C. Difficulty breathing
 - D. Low red blood cell count, low hematocrit or hemoglobin

3. Which immunization(s) is very important in helping to protect a child from getting a pneumococcal infection?
 - A. HIV
 - B. Prevnar and Pneumovax
 - C. Chicken Pox
 - D. Hepatitis B

4. Which of the following is MOST likely to cause a child with a sickle cell disease to have a **lower than usual** blood count?
- A. Spring time
 - B. Fever or infection
 - C. Traveling
 - D. Regular exercising in mild temperatures
5. What type of sickle cell disease does your child have?
- A. Hemoglobin SS (Homozygous S disease/ sickle cell anemia or Hemoglobin S Beta zero Thalassemia)
 - B. Hemoglobin SC Disease
 - C. Hemoglobin S Beta plus Thalassemia
 - D. Inherited anemia syndrome
6. What color urine may indicate that kidney damage may have occurred from sickling?
- A. Bright red or brown
 - B. Orange
 - C. Dark Yellow
 - D. Light Yellow
