Pharmacy Resident Moonlighting Policy

I. Purpose

Children's of Alabama believes that residency training should be a full-time educational experience. Providing residents with a sound academic and clinical education must be carefully planned and balanced with concerns for patient safety and resident well-being. Residents should not be diverted from the primary responsibilities of their educational activities and of the management of patients charged to their care by excessive engagement in moonlighting.

II. Scope

Applies to pharmacy staff involved with the postgraduate year one pharmacy residency program

III. Policy

This publication establishes the requirements for moonlighting activities performed by residents in the postgraduate year one pharmacy residency program. Monitoring of moonlighting activities is the responsibility of the Residency Program Director (RPD).

IV. Procedure

1. MOONLIGHTING

- a. Moonlighting (internal or external) must not interfere with the ability of the resident to achieve the educational goals and objectives of the residency program.
- b. External moonlighting is not permitted. Internal moonlighting may be allowed after licensure and as training, research, and patient care responsibilities permit, subject to resident duty hour requirements.
- c. Residents are required to receive permission from the RPD prior to any moonlighting activities. Moonlighting hours must be approved in person or via email.
- d. All moonlighting hours must be counted towards the 80-hour maximum weekly duty hour limit.
- e. The maximum moonlighting hours allowed is 16 hours per week and is limited to four shifts per month. In order to minimize disruption to learning experiences, weekday shifts may not commence before 2 PM.

2. MONITORING OF MOONLIGHTING HOURS

- a. The RPD will assess the impact of moonlighting on residents' overall performance and ability to achieve the educational goals and objectives of the residency program at least quarterly and at any time concerns arise regarding a resident's judgment or ability to provide safe patient care.
- b. The RPD will assign a "customized" evaluation in PharmAcademic™ on a monthly basis for the reporting of moonlighting hours, which the resident will complete for the past month and the RPD will review and co-sign.
- c. If at any time a resident's participation in moonlighting activities is deemed to have a negative impact on their judgment while on scheduled duty hours or their ability to achieve the goals and objectives of the residency program, the resident will be prohibited from moonlighting for a minimum of 4 weeks.
- d. In light of the serious implications of residents engaging in unauthorized/unreported moonlighting activities, noncompliance with this policy may result in penalties or severe disciplinary action, including dismissal from the residency training program. Specific penalties or disciplinary action will be determined on a case-by-case basis by the RPD in coordination with the RAC.

V. Definitions

Moonlighting: Voluntary, compensated, pharmacy-related work performed outside the organization (external), or within the organization where the resident is in training (internal), or at any of its related participating sites. These are compensated hours beyond the resident's salary and are not part of the scheduled duty periods of the residency program.

RAC: Residency Advisory Committee

RPD: Residency Program Director

Duty hours: Duty hours are defined as all scheduled clinical and academic activities related to the pharmacy residency program. This includes inpatient and outpatient care, in-house call, administrative duties, and scheduled and assigned activities, such as conferences and committee meetings, which are required to meet the goals and objectives of the residency program. Duty hours must be addressed by a well-documented, structured process. Duty hours do not include: reading,

studying, and academic preparation time for presentations or journal clubs; or travel time to and from conferences; and hours that are not scheduled by the RPD or preceptor(s).

VI. Processes

Not applicable.
