

# Project ECHO<sup>®</sup>

## Pediatric Diabetes & Obesity

### 2020 Update

### Specialist Support for Primary Care

Pediatric diabetes, metabolic syndrome and obesity are on the rise. Primary care providers on the front lines of patient care want convenient and up-to-date learning opportunities in best practice medical care of complex conditions. ECHO<sup>®</sup>'s case-based and collegial learning format is the ideal program for this goal. Through Project ECHO<sup>®</sup>, our providers can offer education and support for you in treating these conditions!

### Project ECHO<sup>®</sup> offers the opportunity to:

- Present de-identified cases and obtain specialist feedback
- Review evidence-based practice guidelines
- Gain confidence in treating patients with diabetes and obesity
- Take advantage of convenient virtual learning
- Become an expert in your community

### Meet Our Team

Giovanna Beauchamp, MD  
ECHO Lead  
Pediatric Endocrinologist

Gail Mick, MD  
Pediatric Endocrinologist

Michelle Coulter, CRNP  
Project Coordinator

### Continuing Education

**Why Project ECHO?** Patients with complex health issues need access to health providers, but there are not enough trained specialists available – especially in rural areas. Project ECHO<sup>®</sup> allows specialists from the University of Alabama at Birmingham to train primary care physicians to provide specialty care. This approach results in reduced healthcare costs and improved patient care!
