Dear Colleague,

The photo on the cover of this 2016 - 2017 Directory of Pediatric Services shows one kind of superhero, but within these pages are superheroes of a different kind. And they tell the story of super pediatric programs of national and international renown. Please replace any older versions of the directory with this one. You can also find the most up-to-date directory and other resources for referring physicians on the Healthcare Professionals section of www.ChildrensAL.org.

The healthcare industry continues to change rapidly and so does Children’s of Alabama. Together the COA team is making significant progress in quality, safety and performance improvement through our participation in Solutions for Patient Safety (SPS), a national collaborative involving more than 80 children’s hospitals. The year 2015 also saw the implementation of the new coding system, ICD-10, and our continuing preparations for Alabama’s implementation of Medicaid Managed Care in 2016.

A number of our services were recognized again in 2016 by US News & World Report as being among the top pediatric programs in the nation. We have the facilities and equipment necessary, and we also have the healthcare professionals and programs to compete successfully in the 21st century.

Thank you for all you do to help prevent, treat and put an end to pediatric injury and disease.

Very truly yours,

Wm. Michael Warren, Jr.
President and CEO
This publication is intended to be a quick reference for referring physicians and their staffs, providing a general overview of Children’s of Alabama and its specialty care and support services on campus. This directory is not a comprehensive medical staff directory.

This information and more is also available on our website, www.ChildrensAL.org. Many physicians in private practice have privileges at Children’s of Alabama and may be included on the website upon request.

The Directory of Pediatric Services is printed annually by the Children’s of Alabama Corporate Communications Department. All information has been verified and was accurate at time of printing.

Any edits or additions for future editions are welcome and can be directed to Tiffany Kaczorowski in Corporate Communications at 205.638.6916 or 205.638.6660 (main number), or via email to Tiffany.Kaczorowski@ChildrensAL.org.

Children’s One Stop/Placement Center is an expanded service of what was formerly known as Patient Placement. Children’s One Stop assists physicians with all aspects of emergency or inpatient referral — from patient placement/admissions to consults, transports and transfers.

Referring physicians may now also use One Stop to contact Children’s specialists for advice — even when the patient in question is not being seen for an emergency or being considered for admission to Children’s.

How does it work?
1. Referring physician calls One Stop using one of the numbers above
2. House Coordinator (HC) obtains information about patient and a direct callback number
3. HC initiates a three-way call with Children’s physician, if needed
4. If decision is made to transfer, HC calls referring facility back with transfer information
Physician Link is a telephone resource for referring physicians to use for any non-emergency issues or concerns.

This is also the best way for primary care physicians and office staff to receive guidance throughout the referral process and obtain general Children’s information.

Referring physicians can:
- Call Monday — Friday, 8 am — 4:30 pm
- Provide general information
- Assist in patient follow-up
- Assist in physician concerns
- Resolve issues/concerns
- Help facilitate the patient referral process

Please refer to individual divisions for direct referral phone numbers.
The Healthcare Professionals website provides forms, directions and contact information to help facilitate the referral process. To access directly, go to: www.ChildrensAL.org/for-healthcare-professionals.

Our website for Healthcare Professionals includes the following resources:

- Children’s One Stop (Patient Placement/Admissions, Consults, Transports & Transfers)
- CME Opportunities
- Credentialing
- Inside Pediatrics magazine
- Patient Referral Forms
- Physician Link (resolve issues/concerns)
- Safe Teen Driving Toolkit
Our medical and surgical divisions include a number of specialty care and support services, represented in this listing as:

(a) appointments, (o) office number and/or (f) fax number. ALL numbers use the (205) area code unless otherwise noted.

- UAB Primary Care

5th Avenue South Entrance:
- Adolescent Health Center
- CHIPS Center
- Gynecology

Parking is in the 5th Avenue Deck.
Children’s South Pediatric Outpatient Center
The Children’s South Pediatric Outpatient Center serves patients from newborn to 21 years of age. It is located off Interstate 459 and Acton Road south of Birmingham.

Children’s South provides another location for Children’s renowned outpatient surgery services, Pediatric Imaging Center, laboratory services, specialty care clinics and After Hours (formerly the After Hours Pediatric Center in Vestavia Hills) care.

After Hours Clinic (AHC) is a referral clinic that is open evenings and weekends when pediatricians’ offices are closed. Patients must be referred by their private pediatrician first and then will be given the AHC phone number. (For more on AHC, please see page 18.)

The Children’s South Laboratory offers comprehensive laboratory services.

The Outpatient Surgery Center (OSC) provides care for patients undergoing outpatient procedures involving general anesthesia for diagnostic and therapeutic procedures. More than 7,000 surgeries are performed at the OSC annually on patients 3 months to 19 years of age.

In addition to its surgeons, the center is staffed by experienced pediatric perioperative nurses, as well as board-certified pediatric anesthesiologists and CRNAs.

The Pediatric Imaging Center (PIC) provides X-ray, CT (cat scan), MRI, ultrasound and sedation imaging services.
Children’s South Specialty Clinics have the capacity to accommodate 30,000 — 40,000 specialty visits per year for services including:

- Allergy/Immunology
- Audiology
- Dermatology
- Endocrine Clinic
- Genetics Clinic
- Imaging at the Pediatric Imaging Center (PIC)
- International Adoption Clinic
- Neurology with EEG capabilities
- Ophthalmology
- Orthopedics
- Otolaryngology/PENTA (Pediatric ENT Associates)
- Physical and Occupational Therapy (in specified clinics only)
- Pulmonary Medicine
- Rehabilitation Medicine
- Rheumatology
- Sports Medicine
- Urology
- Weight Management (SHINE Clinic)

Children’s South
1940 Elmer J. Bissell Road
Birmingham, AL 35243

(205) 638-4800 or (800) 226-4770 for Central Scheduling
The Children’s South After Hours clinic is a referral clinic. We ARE NOT A WALK-IN CLINIC. After Hours does not take the place of the Primary Care Pediatrician (PCP). We require a referral from either the PCP’s office OR from a Pediatric Health Information Line (PHIL) nurse, who will notify the PCP that a patient was referred to After Hours.

The clinic sees patients as follows:
1. Patient is unable to see the regular physician during the day.
2. Patient has a minor emergency during hours when the physician’s office is closed.
3. PCP or PHIL nurse calls or Faxes referral to After Hours.
4. Parent makes an appointment, as long as the PCP has been contacted and the referral is on its way.
5. Patients who require more emergent or advanced care or require admission to the hospital will be transferred to Children’s Russell Campus downtown.

Hours of Operation
Monday — Friday, 5 — 10 pm
(Last appointment at 9:30 pm)
Saturday — Sunday, 12 — 8 pm
(Last appointment at 7:30 pm)
After Hours at Children’s South
Tips for the Primary Care Office

Scenario #1:
Doctor’s office is open; however, all appointments are booked.
Solution:
• Explain to parent that After Hours Clinic accepts appointments Monday — Friday from 5 — 9:30 pm and Saturday and Sunday from noon — 7:30 pm.
• Office nurse calls or faxes referral.
• Parent calls and requests appointment time.

Scenario #2:
Doctor’s office is closed but is contracted with PHIL to take calls.
Solution:
• Parent leaves a message with PHIL, and an on-call nurse calls parent back.
• PHIL nurse notifies After Hours Clinic that patient will be coming in and sends referral.
• Parent calls to request appointment time.

Scenario #3:
Doctor’s office is open, but child’s condition is urgent or needs a higher level of care.
Solution:
• Send parent/child to the Emergency Department.
Huntsville
The North Alabama Sickle Cell Clinic meets at 301 Governors Drive SW, Huntsville, Alabama 35801. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

See page 26 for North Alabama Children’s Specialists.

Montgomery
The Nephrology and Hypertension Clinic meets from 8:30 am — 3 pm on the second Friday of each month at Physicians to Children. Call (205) 638-9781 for scheduling. Rheumatology also holds clinics in Montgomery. Call (205) 638-9438 for scheduling.

The Sickle Cell Clinic meets at the Morrow Medical Tower of Baptist Medical Center South, 2055 East South Boulevard, Suite 202, Montgomery, Alabama 36116. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

Opelika
The Sickle Cell Clinic meets at the East Alabama Medical Center Prenatal Clinic, 2000 Waverly Parkway, Opelika, Alabama 36801. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

Tuscaloosa
The Sickle Cell Clinic meets at the Capstone Medical Center 700 University Boulevard East, Tuscaloosa, Alabama 35401. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

The William A. Daniel, Jr. Adolescent Health Center provides primary and subspecialty care to adolescents. Care is provided by a team of health professionals (physicians, psychologists, nutritionists, nurses and social workers) specially trained to handle the unique problems of adolescents.

Services include:
- Adolescent Clinic, a primary care clinic for adolescents 11 — 21 years old
- Eating Disorders Clinic, specializing in medical and nutrition care for adolescents with disordered eating
- Adolescent Nutrition Clinic, providing counseling for a variety of nutritional concerns
- LEAH (Leadership Education in Adolescent Health), an interdisciplinary clinic for adolescents with complex health problems
- Inpatient and Outpatient Consultative Services
- Reproductive Health Services
- Sports Physicals

Weight Management

Formerly known as the Children’s Center for Weight Management, the SHINE Clinic is an acronym for Support and Help in Nutrition and Exercise. The name is changed to diminish the stigma associated with obesity, but our goal remains the same: to offer a behavior-based weight management program for children and adolescents.

Our multidisciplinary team of pediatricians, endocrinologists, nurses, psychologists, dietitians and physical therapists uses a comprehensive approach to weight management. We educate families about the benefits of healthy eating and an active lifestyle with an emphasis on setting realistic goals. With our medical and psychological support, children and families are able to overcome barriers that may get in the way of success. Please consult our website for up-to-date information regarding forms to schedule appointments and new programs coming to the clinic.

The SHINE Clinic

Children’s of Alabama Clinic for Support and Help In Nutrition and Exercise

Our services include:
- Multidisciplinary evaluation to develop a family behavioral plan
- Referrals to UAB Weight Loss Medicine for bariatric surgeries (18 years and older only)

Board-certified subspecialists in the Division of Pediatric Allergy, Asthma and Immunology specialize in the diagnosis and treatment of children with allergic and immunologic diseases. Allergic disorders diagnosed and treated by division physicians include allergic rhinoconjunctivitis (hay fever), allergic and nonallergic asthma, urticaria (hives), angioedema (swelling disorders), atopic dermatitis (eczema) and allergies to foods, stinging insects and medications. Division physicians also specialize in the diagnosis and treatment of hereditary immune deficiencies (Primary Immune Deficiencies).

We are Alabama’s only all-pediatric allergy group. Our main campus clinic is located in Children’s Park Place and offers next-day appointments and free, convenient parking.

Dr. Suthida Kankirawatana also sees patients at Children’s South, 1940 Elmer J. Bissell Road, Birmingham, AL 35243.

The Joseph S. Bruno Pediatric Heart Center, located in the Benjamin Russell Hospital for Children, links with the adult congenital heart surgery facilities at UAB. The two are connected by the Women & Infants Center, which allows easy access to the Pediatric Cardiology Clinic, as well as UAB’s high-risk obstetric birthing suites and regional neonatal intensive care unit. We now provide a unique single platform continuum of care for fetal, neonatal, pediatric and adult patients with congenital heart disease. Services offered:

- Complex repair of pediatric congenital heart disease
- Minimally invasive pediatric cardiac surgery
- Acquired heart disease
- Advanced heart failure
- Ventricular Assist Device implantation and management
- Cardiac transplantation
- Pulmonary hypertension
- Fetal cardiology
- Electrocardiograms
- Echocardiography
- Exercise testing
- Cardiac CT angiography
- Cardiac MRI
- Cineangiography
- Catheterization laboratories (includes interventional catheterizations)
- Cardiac Electrophysiology
- Three-dimensional electrophysiologic mapping, which minimizes radiation
- Hybrid catheterization lab (both a cath lab and surgical suite)
- Dedicated same-day and post-anesthesia care unit
- Heart-specific operating rooms
- State-of-the-art 20-room CVICU (intensive care unit for heart patients)
- ECMO suites (four dedicated to pediatric heart/lung bypass treatment)
- Easy access to the UAB high-risk obstetric birthing suites and regional neonatal intensive care unit

Child Abuse Pediatrics Division was established to expand services provided by the Children’s Hospital Intervention and Prevention Services (CHIPS) Center at Children’s of Alabama. The CHIPS Center provides forensic medical evaluations, psychosocial assessments, play therapy, counseling, social work services, prevention education, court support and expert court testimony for victims of child abuse. The goal of Child Abuse Pediatrics is to coordinate the CHIPS Center services with local, regional and state resources and organize educational efforts to increase awareness, understanding and reporting of child maltreatment.

Pediatric Critical Care Medicine provides services to patients with medical and surgical conditions such as respiratory failure, shock, seizures, traumatic injuries, meningitis and other life-threatening diseases. The Pediatric Critical Care Division provides this care for children in the Pediatric Intensive Care Unit at Children’s of Alabama in the Russell Building.

Special support modalities include: CVVH, ECMO and high-frequency ventilation. Special research interests include: lung injury, traumatic brain injury, sedation, shock, simulation and patient safety.

The division also offers a sedation service for children undergoing painful procedures or therapy. The division also provides medical direction for the pediatric critical care transport team who transport critically ill children via ground or air transport.

The Children's of Alabama Dental Clinic is a teaching clinic where, in association with the University of Alabama School of Dentistry, dentists receive training to become specialists in Pediatric Dentistry. This clinic provides comprehensive dental healthcare to children younger than age 18 and provides emergency dental services and dental treatment to children with special needs and/or physical challenges, as well as those who are medically compromised. All care is overseen by board-certified pediatric dentists on the faculty of the UAB Department of Pediatric Dentistry.

The Department of Pediatric Dentistry’s faculty also see private patients in the UAB Dental Group’s Pediatric Faculty Practice. This clinic offers care delivered directly by the faculty in a private practice model. Days of operation, services provided and ages accepted are specified by each dentist and can be provided upon request.

Services provided:
- Oral hygiene care and education
- Dental restorations
- Extractions
- Pulp therapy
- Treatment of trauma, including placement of sutures and splints
- Minimal oral sedation
- Dental treatment under general anesthesia

Emergency services are available through the emergency room for trauma emergencies after hours.

Dermatology treats all diseases of the skin, including acne, skin tumors, psoriasis and severe atopic dermatitis. The Pediatric Dermatology Clinic is located at Children’s South, 1940 Elmer J. Bissell Road, Birmingham, Alabama 35243. The outpatient clinic is part of the UAB Department of Dermatology, which serves as a regional center for treating dermatological disorders.

Conditions treated:
- Diseases of skin, hair and nails
- Hemangiomas
- Genetic skin disorders
- Port wine stains

Physicians/Health Professionals:

Associate Professor

Ashley Hanna, CRNP
Developmental-Behavioral Pediatrics provides clinical care, research and training in developmental and behavioral conditions. A major focus is providing family-centered care, including transition to adulthood, for children with these and other related conditions:

- Attention Deficit/Hyperactivity Disorder
- Autism Spectrum Disorder
- Intellectual Disability
- Learning Disabilities
- Developmental Delays
- Behavioral or developmental symptoms of genetic conditions or other medical conditions
- Common behavioral conditions (sleep, toileting, etc.)

Our goal is to provide expert care for a growing population of children who struggle with difficulties with behavior, development, learning and social skills. We work alongside many other disciplines to provide the most effective therapies and services for the children we see. We are working to conduct basic and clinical research that focuses on identification of the genetic and neurobiological basis for many developmental and behavioral conditions. We also engage in advocacy and community efforts on the local, state and national levels to improve access to services and support for children and families under our care.

The Division of Pediatric Endocrinology at Children’s of Alabama provides comprehensive multidisciplinary evaluation and management of children with diseases of the endocrine system. The Endocrinology faculty is comprised of certified nurse practitioners and fellowship-trained physicians. The Pediatric Diabetes Center is an ADA-recognized diabetes self-management training center.

Specific services include, but are not limited to:
- Adrenal gland disorders
- Abnormalities of bone metabolism
- Calcium disorders
- Carbohydrate disorders and hypoglycemia
- Diabetes — type 1, type 2 and insulin pump therapy
- Disorders of puberty
- Growth problems
- Lipid disorders in children
- Newborn screening for thyroid and adrenal disorders
- Pituitary gland disorders
- Thyroid disorders
- Water and electrolyte disorders

General and Thoracic Surgery offers comprehensive general and specialized surgical treatment of a wide range of neonatal, pediatric and adolescent conditions. Our physicians are fellowship-trained pediatric surgery specialists who coordinate with other fellowship-trained pediatric specialists, including pediatric anesthesiologists, to ensure the best and most up-to-date care available.

We use advanced laparoscopic and thoracoscopic techniques in many of the procedures to minimize pain, speed recovery and reduce scarring.

Our physicians evaluate and treat conditions ranging from the simple to the complex including:

- Hernias and Undescended Testes
- Neonatal Surgery
- Cancer Surgery
- Venous Access
- Feeding Tube Access
- Disorders of the Biliary System
- ECMO
- Trauma and Burns
- Adolescent Bariatric Surgery
- Chest and Lung Surgery
- Laparoscopic and Thoracoscopic Procedures

The Alabama Center for Childhood Cancer and Blood Disorders is a partnership between Children’s of Alabama and the UAB Division of Pediatric Hematology and Oncology. More than a dozen highly specialized pediatric hematologists, oncologists and blood and marrow transplant physicians at Children’s provide care to infants through young adults up to age 25. Our multidisciplinary team approach provides family-centered treatment and support through a variety of innovative services from the day of diagnosis through treatment, cure and long-term follow-up.

Specific services include:

**Pediatric Oncology**
- All forms of Childhood Cancer
- The division is a member of the Children’s Oncology Group

**Pediatric Hematology**
- Sickle Cell Disease and other hemoglobin defects
- Hemophilia and other bleeding disorders
- Includes a federally recognized comprehensive hemophilia clinic
- Rare defects of platelets, white blood cells and other blood disorders

**Neuro-Oncology**
- State-of-the-art treatment for brain and spinal cord tumors with individualized patient care plans
- Extensive participation in clinic research studies, including Children’s Oncology Group, Neurofibromatosis Consortium and industry-sponsored protocols
- Close collaboration with UAB Radiation Oncology, including 3-D Conformal and Gamma Knife Therapy

Pediatric Hospital Medicine (PHM) is led by Dr. Robert Pass and includes 12 additional physician faculty members and five fellows. Pediatric Hospital Medicine offices are located on the first floor of the McWane Building, Suite 108.

Physicians in Pediatric Hospital Medicine provide care to patients hospitalized on the general inpatient service at Children’s of Alabama, organize faculty staffing for five or six inpatient teams 24 hours per day and coordinate inpatient care with primary care or specialty physicians who follow patients after hospital discharge.

Faculty members are responsible for teaching and supervising resident physicians. In addition, they instruct medical students and assist in the development of the medical student curriculum for inpatient pediatrics. Pediatric Hospital Medicine also trains hospitalists; a two-year fellowship program was started in 2012.

Research activities of Pediatric Hospital Medicine are aimed at developing clinical pathways for specific conditions, measuring and improving quality of care and measuring physician performance.

More information on Pediatric Hospital Medicine at Children’s of Alabama is available at www.uab.edu/medicine/peds/hospitalmed.

The Pediatric Division of Infectious Diseases provides outpatient and inpatient care for infants, children and adolescents with illness of known or suspected infectious etiology. The division manages hospital infection control and provides leadership for antibiotic administration.

Conditions Treated:
• Bloodstream infections
• Pneumonias
• Fever of unknown origin
• Recurrent infections
• Meningitis
• Viral diseases
• Skin and soft tissue infections
• Encephalitis

Interventional Radiology (IR) is a subspecialty of Diagnostic Radiology that has become an integral part of comprehensive patient care, providing less invasive techniques for the diagnosis and treatment of a broad range of health problems. Our group uses cutting-edge interventional devices and state-of-the-art imaging equipment to perform a variety of innovative interventional procedures for treatment of several diseases.

Procedures
Interventional Radiology offers a full spectrum of procedures, often performed on an outpatient basis, including:

- Embolization of vascular malformations
- Angiography, Angioplasty and Stenting
- Transarterial Chemoembolization (TACE)
- Radioembolization of Liver Tumors
- Ablation of Solid Tumors
- Ablation of Liver Tumors
- Ablation of Spine and Other Bone Tumors
- Biliary Interventions, including PTC, PTD, Plastic Stents and Stone Removal
- Central Venous Access Catheter Placement and Management
- Dialysis-Related Interventions, including Fistulogram and Declot of Dialysis Graft
- Gastrostomy and Gastrojejunostomy Tube Placement and Management
- Inferior Vena Cava Filter Placement and Removal
- Spine Augmentations, including Vertebroplasty and Kyphoplasty
- Urologic Interventions, using Nephrostomy, Nephroureterostomy and Ureteral Stent Placement and Retrieval
- Percutaneous Abscess Drainage
- Venous Interventions including Angioplasty and Stenting
• Arterial and Venous Thrombolysis
• Transjugular Intrahepatic Portosystemic Shunts (TIPS)
• Embolization of Gastrointestinal Bleeds
• Adrenal venous sampling and other venous sampling
• WADA test

Physicians:

Chief, Vascular and Interventional Radiology
Co-Medical Director, Heart and Vascular Center at UAB

Rachel F. Oser, MD
Associate Professor of Radiology
Director, Interventional Radiology at Children’s of Alabama
Fellowship Program Director, Vascular and Interventional Radiology

Joseph B. Eason, MD
Assistant Professor of Interventional Radiology

Nathan Ertel, MD
Assistant Professor of Radiology

Souheil Saddekni, MD, FSIR, FAHA
Professor of Radiology and Medicine

Edgar S. Underwood, MD
Associate Professor of Radiology
Medical and Surgical Divisions N
Physicians in the Division of Neonatology provide comprehensive care to newborn infants using a family-centered approach, combined with state-of-the-art technology, including high frequency ventilation, inhaled nitric oxide, transcutaneous blood gas monitoring, whole body hypothermia, dialysis and multispecialty consultation, cardiovascular surgery, all pediatric surgeries and extracorporeal membrane oxygenation. The Division of Neonatology is responsible for the operation of the Neonatal Intensive Care Units (NICU) at Children’s of Alabama and the Regional Newborn Intensive Care Unit (RNICU) at the UAB Women and Infants Center. Continuity of care between the two units is facilitated by three bridges between the UAB Women and Infants Center and the Russell Building at Children’s of Alabama. Our physicians accept referrals from around the state, country and world for conditions such as:

- Prematurity
- Respiratory distress syndrome
- Infections
- Necrotizing enterocolitis
- Hypoxic-ischemic encephalopathy
- Pulmonary hypertension
- Bronchopulmonary dysplasia
- Intraventricular hemorrhage/
  Post-hemorrhagic hydrocephalus
- Retinopathy of prematurity
- Inborn errors of metabolism
- Multiple other problems
- Cardiac disorders
- Genetic problems
- Surgical problems

The Division of Nephrology provides comprehensive care for newborn infants, children and adolescents, using a family-centered approach combined with state-of-the-art technology. The division is the only service in Alabama to offer in-center hemodialysis, home hemodialysis, home peritoneal dialysis, plasmapheresis and renal transplantation to pediatric patients.

Conditions treated:
- End-stage renal failure
- Glomerulonephritis
- Enuresis
- Fluid and electrolyte problems
- Hematuria
- Hypertension
- Proteinuria
- Renal transplantation
- Kidney stones
- Systemic lupus erythematosus
- Acute renal failure
- Nephrotic syndrome
- Recurrent urinary tract infections
- Renal tubular acidosis
- Congenital Anomalies of the Kidney and Urinary Tract (CAKUT)
- Genetic kidney conditions, including polycystic kidney disease

Pediatric Neurology provides inpatient consultative services at both Children’s of Alabama and UAB Hospital. Our Epilepsy Monitoring Unit is designated Level 4 by the National Association of Epilepsy Centers (NAEC), which is the highest level for units specializing in a continuum of care for patients, from seizure evaluations to seizure treatment plans. Patient diagnoses covers a range of problems, including seizure disorders, neurodegenerative diseases, primary muscle diseases, developmental problems and acute encephalopathies.

The division provides ambulatory services through general pediatric neurology clinics at Children’s of Alabama. An expanding research program is investigating basic and clinical problems related to epilepsy, child development, genetics and biochemical diseases.

**Pediatric Epilepsy Program**

Our Level 4 Epilepsy Monitoring Unit is state-of-the-art, child friendly and accommodates up to 10 patients daily. Treatments for seizures include medications, dietary therapies and surgical interventions when seizures remain poorly controlled. Our epilepsy surgery program is one of the fastest growing in the nation. To advance epilepsy care, we are also actively involved in research in pharmaceutical and neuroimaging/engineering methodologies.
Neurology continued ...

CPODD
The Center for Pediatric Onset Demyelinating Disease (CPODD) is one of six Pediatric MS Centers of Excellence nationwide established by the National Multiple Sclerosis Society (NMSS). We provide comprehensive multidisciplinary care for children and teens with MS and other CNS demyelinating diseases and up-to-date, accurate information about MS and related disorders to patients and families, schools, health care providers and the public at large. We also conduct extensive research in the field of demyelinating diseases.

The experienced ophthalmology specialists at UAB Callahan Eye Hospital and Clinics offer patients the most advanced vision care available. This means having the knowledge and expertise to identify any problem, as well as the advanced training necessary to deliver cutting-edge treatments for eye diseases. From highly specialized eye surgery to fitting patients for their first pair of contact lenses, UAB provides comprehensive services for all vision needs.

The main office address is:
1720 University Boulevard
Birmingham, AL 35233

UAB Callahan Eye Hospital Clinic also sees patients at Children’s South. The office address is:
1940 Elmer J. Bissell Road, Suite B
Birmingham, AL 35243

Alabama Ophthalmology Associates (AOA) Services also are provided by Alabama Ophthalmology Associates. Physicians in this group include specialists in cornea and external disease, ophthalmic plastic and reconstructive surgery, pediatric strabismus, adult strabismus and comprehensive ophthalmology.

The main office address on Birmingham’s Southside is:
1000 South 19th Street
Birmingham, AL 35205

AOA also sees patients at Children’s Russell campus. The office address is:

The Children’s of Alabama Palliative and Supportive Care Team is a specially trained interdisciplinary team that provides care for children and their families with complex, chronic or life-threatening illnesses. We are focused on providing patients relief from pain, symptoms (for example, shortness of breath or nausea) and the stress of serious illness — whatever the diagnosis.

Our team includes doctors, nurses and other specialists (pastoral care, psychology, social work, child life and physical therapy) who partner with the patient’s physicians to provide an extra layer of support. The goal of the Palliative and Supportive Care Team is to improve the quality of life for both the patient and family.

Palliative and supportive care is appropriate at any age and at any stage in a serious illness and can be provided together with curative treatment. Our interdisciplinary team works in collaboration with the primary team to address physical, emotional, psychological, practical and spiritual issues that may contribute to suffering or interfere with healing. We strive to make every day better for our patients and their families, to promote healing, comfort and hope, no matter what the outcome may be.

The Division of Pulmonary and Sleep Medicine specializes in the treatment of patients with a variety of lung disorders, including asthma, bronchopulmonary dysplasia (BPD), cystic fibrosis (CF), pneumonias, sleep disorders, lung problems related to neuromuscular disorders and ventilator dependence. We are committed to family-centered care and work with a variety of support services such as nutrition, social work, speech pathology, respiratory therapy and psychology, among others.

Our group is committed to advancing the understanding of respiratory diseases through basic, translational and clinical research. Our division is actively involved in clinical research projects, including development of new therapies for cystic fibrosis, neuromuscular disorders, sleep disturbances in children and outcomes research in asthma and cystic fibrosis.

Areas of Expertise
Our team evaluates and treats a range of conditions, including:
- Asthma
- Aerodigestive disorders in collaboration with Gastroenterology and Otolaryngology Divisions

Medical and Surgical Divisions
The Division of Pediatric Rehabilitation Medicine utilizes an interdisciplinary approach to address the prevention, diagnosis, treatment and management of congenital and childhood onset physical impairments, including related or secondary medical, physical, functional, psychosocial, cognitive and vocational limitations or conditions, with an understanding of the life course of disability. Commonly treated conditions include cerebral palsy, spina bifida, muscular dystrophy and brachial plexus injury, among others.

In addition to its comprehensive outpatient services, the division is home to the only acute pediatric inpatient rehabilitation service in the state, providing services for children and adolescents with acquired brain injuries, spinal cord injuries, brain tumors, strokes and other disabling illnesses or injuries.

Pediatric Rehabilitation Medicine

Paola “Lala” Mendoza-Sengco, MD
Assistant Professor

Erin Swanson, MD
Assistant Professor
Pediatric Rheumatology offers comprehensive diagnostic and therapeutic services for juvenile rheumatic disorders, including arthritis, lupus, myositis, Sjögren’s syndrome, vasculitis, sarcoidosis, scleroderma and other related systemic autoimmune and musculoskeletal disorders. In addition, an intravenous infusion suite is available for the administration of targeted biologic agents and a broader range immunosuppressive therapies.

Also offered are specialty-specific clinics for patients with Juvenile Spondyloarthritis and Juvenile Lupus. In addition to providing outstanding patient care by expert clinicians, these clinics also offer patients and families the opportunity to participate in disease-related National Institutes of Health- and foundation-funded research programs garnered by pediatric rheumatologists at Children’s of Alabama and the University of Alabama at Birmingham.

UAB Sports Medicine at Children’s of Alabama provides a full array of orthopedic services and expertise. The major objective of this specialty is to provide comprehensive coverage for injuries sustained by athletes, including diagnosis, treatment, surgical services (if necessary) and rehabilitation of sports-related injuries.

Sports Medicine also provides services to the Concussion Clinic at Children’s of Alabama. The clinic was established to provide evaluation, treatment and medical clearance for “return to play” for youth and teenage athletes in our community.

In addition, Sports Medicine works with the Alabama sports community to educate parents, athletic trainers, coaches and athletic directors about the prevention, diagnosis and treatment of concussions in youth athletes.
