This publication is intended to be a quick reference for referring physicians and their staffs, providing a general overview to Children’s Hospital and its specialty care and support services on campus. This directory is not a comprehensive medical staff directory.

This information and more is also available on our web site, www.chsys.org. Many physicians in private practice have privileges at Children’s Hospital and may be included on the website upon request.

The Directory of Pediatric Services is printed annually by the Children’s Hospital Corporate Communications Department. All information has been verified and was accurate at time of printing.

Any edits or additions for future editions are welcome and can be directed to Tiffany Kaczorowski in Corporate Communications at 205.939.6916 or 205.939.6660 (main number) or via email at Tiffany.Kaczorowski@chsys.org.
Dear Colleague:

We are pleased to provide you with the 2011 Directory of Pediatric Services. Please replace any older versions with this one. You can also find the most up-to-date directory and other resources for referring physicians on the Healthcare Professional section of www.chsys.org.

After much deliberation, Children’s has decided to restructure its physician relations department. For more than 25 years, representatives of the health system have traveled the state, bringing to your offices health system news and updates. In turn, you and your office staff have shared your suggestions and concerns with these representatives and we thank you for your feedback throughout the years.

We can continue to communicate effectively using today’s new technology. By phasing out the routine travel portion of the physician relations function, we can now focus our resources and attention on a new, enhanced customer service effort.

We hope to use e-mail sparingly yet effectively to share pertinent news with you. We will strive to keep the Healthcare Professionals section of the website robust and easy to use. Finally, we are establishing Physician Link (205) 212-7479 which we hope will assist you and facilitate access to services or patient correspondence. This will not take the place of the normal referral process.

We ask for your support as we make this transition. Please contact Lori Ewoldsen, V.P. Customer Service at (205) 939-9434 or lori.ewoldsen@chsys.org with questions and suggestions.

Very truly yours,

Wm. Michael Warren, Jr.
Chief Executive Officer
Children’s Health System
Physician Link
(205) 212-7479
Physician Link is a telephone resource for referring physicians to use for any non-emergency issues or concerns.

This is also the best way for which primary care physicians and office staff can receive guidance throughout the referral process and obtain general CHS information.

Referring physicians can:
• Call Monday-Friday, 8:00am-4:30pm
• Provide general information
• Assist in patient follow-up
• Assist in physician concerns
• Provide link to resolve issues
• Help facilitate the patient referral process

Please refer to individual divisions for direct referral phone numbers.

One Stop Calling / Patient Placement
(205) 212-7200
One Stop Calling/Patient Placement is to assist referring physicians with admitting patients to Children’s Hospital in an emergency situation. If a child is seen by their primary care doctor and is deemed ill enough to need a bed right away, this serves as the contact number for referring pediatricians when making immediate placement arrangements.

How does it work?
1. Receive call from referring physician
2. Obtain information about patient and a direct call-back number
3. Contact appropriate CHS physician and initiate conference call
4. If decision is made to transfer, the Patient Placement Coordinator will call referring facility with room and phone number for the nurse to call report
Healthcare Professionals Website

www.chsys.org
The Healthcare Professionals Website provides forms, directions and contact information to help facilitate the referral process. In addition, the website will reflect the latest news regarding CHS divisions.

Our updated website offers several services:

• Patient referral forms
• One Stop Calling / Patient Placement
• Physician Link
• CME Opportunities
• Maps and Directions
Our medical and surgical divisions include a number of specialty care and support services, represented in this listing.

Children's on 3rd Outpatient Center
PT & OT • Hearing and Speech • HEAR Center
1208 3rd Avenue South
Birmingham, Alabama 35233
(205) 212-7500
The expansion project will enable the hospital to expand services provided to pediatric patients, improve operating efficiencies, address growth in the pediatric population served, and increase access to family-centered services, as well as provide an environment conducive to improving and expanding pediatric teaching and research.

Children’s Hospital is currently licensed for 275 specialty pediatric beds (290 including NICU bassinets). Upon completion of the building, the number of licensed specialty pediatric beds will increase to 332.

In recognition of Trustee Ben Russell’s $25 million gift, Children’s entire downtown campus will be renamed the Benjamin Russell Hospital for Children. The opening of the new facility is planned for 2012.
Children's South Pediatric Outpatient Center
The Children's South Pediatric Outpatient Center, located at Interstate 459 and Acton Road south of Birmingham, serves patients from newborn to 21 years of age. Children's South provides another location for Children's Health System's renowned outpatient surgery services, specialty care clinics and After Hours (formerly the After Hours Pediatric Center in Vestavia Hills) care.

The Outpatient Surgery Center does more than 7,000 a year on patients 3 months to 19 years of age.

Children's South Specialty Clinics have the capacity to accommodate 30,000 - 40,000 visits per year. These specialties include:

- GI
- Allergy/Asthma
- Endocrinology
- Neurology
- General Pediatric Surgery
- Orthopedics
- Otolaryngology (ENT)
- Urology
- Dermatology
- Weight Management
- Rehabilitation Medicine
- Physical and Occupational Therapy
- International Adoption Clinic

Co-Director, Adolescent Eating Disorder Clinic
Board-certified subspecialists in the Division of Pediatric Allergy, Asthma and Immunology specialize in the diagnosis and treatment of children with allergic and immunologic diseases.

Allergic disorders diagnosed and treated by division physicians include allergic rhinoconjunctivitis (“hay fever”), allergic and nonallergic asthma, urticaria (“hives”), angioedema (swelling disorders), atopic dermatitis (“eczema”) and allergies to foods, stinging insects and medications.

Division physicians also specialize in the diagnosis and treatment of hereditary immune deficiencies (Primary Immune Deficiencies).

The clinic is located in Children's Park Place and offers next-day appointments and free, convenient parking. It is Alabama’s only all-pediatric allergy group.

Cardiology provides medical expertise in the diagnosis and treatment of heart disease in children and adolescents. It serves as the diagnostic unit for the noted Alabama Congenital Heart Disease Diagnosis and Treatment Center.

Services offered:
• Cardiac catheterization
• Electrocardiograms
• Echocardiography
• Cardiac CT and MRI
• Heart failure/transplantation
• Fetal cardiology
• Cineangiography
• Exercise testing
• Electrophysiology
• Interventional catheterizations
• Pulmonary hypertension

F. Bennett Pearce, M.D.
Professor

Robb Romp, M.D.
Associate Professor
Pediatric Critical Care provides services to patients with medical and surgical conditions such as respiratory failure, shock, seizures, traumatic injuries, meningitis and other life-threatening diseases. The Pediatric Critical Care Division provides this care for children in the Pediatric Intensive Care Unit at Children's Hospital and the Cardiovascular Intensive Care Unit at University Hospital.

Special support modalities include CVVH, ECMO and high-frequency ventilation. Special research interests include lung injury, traumatic brain injury, sedation and shock.

The division also offers a sedation service for children undergoing painful procedures or therapy. The division also provides medical direction for the pediatric critical care transport team who transport critically-ill children via ground or air transport.

**Physicians:**

**Margaret Winkler, M.D.**
Professor
Ann Dial McMillan Chair in Pediatric Critical Care
Director, Critical Care Division

**Jeffrey Alten, M.D.**
Associate Professor

**Santiago Borasino, M.D., M.P.H.**

**Nancy Tofil, M.D., M.Ed.**
Associate Professor

Frederick W. Renneker, III Co-Chair in Pediatric Education
The Dental Clinic, in association with the University of Alabama School of Dentistry, provides comprehensive dental health care to children under the age of 15, emergency dental services and dental treatment to children with special needs and/or physical challenges, as well as those who are medically compromised.

Services provided:
• Oral hygiene care and education
• Dental Restorations
• Extractions
• Pulp Therapy
• Treatment of trauma including placement of sutures and splints
• Orthodontics-interceptive and preventative
• Minimal Oral Sedation
• Dental treatment under general anesthesia

Emergency services are available through the emergency room for trauma emergencies after hours.

Dentists:
Janice G. Jackson, D.M.D.
Associate Professor, Pediatric Dentistry
Director, Pediatric Dentistry Program

Noel K. Childers, D.D.S., M.S., Ph.D.
Joseph F. Volker Endowed Professor
Chair, Department of Pediatric Dentistry

Stephen C. Mitchell, D.M.D., M.S.
Associate Professor, Pediatric Dentistry
Director, Predoctoral Pediatric Dentistry
Dermatology treats all diseases of the skin, including acne, skin tumors, psoriasis and severe atopic dermatitis. The outpatient clinic is part of the UAB Department of Dermatology, which serves as a regional center for treating dermatological disorders.

Conditions treated:
- Diseases of skin, hair and nails
- Hemangiomas
- Genetic skin disorders
- Port wine stains

Physicians:
Amy J. Theos, M.D.

The Division of Pediatric Endocrinology at Children’s Hospital provides comprehensive multidisciplinary evaluation and management of children with diseases of the endocrine system.

The Endocrinology faculty is comprised of certified nurse practitioners and fellowship-trained physicians. The Pediatric Diabetes Center is an ADA recognized diabetes self-management training center.

Specific services include but are not limited to:
- Adrenal gland disorders
- Abnormalities of bone metabolism
- Bone and calcium disorders
- Carbohydrate and lipid disorders
- Diabetes – type 1, type 2, and insulin pump therapy
- Disorders of puberty
- Growth problems
- Lipid disorders in children
- Newborn screening
- Pituitary gland disorders
- Thyroid disorders
- Water and electrolyte disorders

The General Inpatient (GIP) Service provides care to all hospitalized infants, children and adolescents except for those admitted to a surgical service, subspecialty or the intensive care unit. The GIP service is staffed by nine faculty members, all of whom serve as attending physicians on inpatient teams and teach residents and medical students in the clinical setting. In addition, GIP faculty are involved in research aimed at process improvement, enhancing communication with primary care and referring physicians and improving clinical outcomes.

Physician members of the GIP service receive support from a multidisciplinary team that includes nurse case managers, social workers and hospital-based pharmacists. The goal of the GIP service is to provide prompt, family-centered, high-quality care to hospitalized patients and to see that hospital care is effectively linked to outpatient care following discharge.

The Division of Pediatric Surgery offers comprehensive general and specialized surgical treatment of a wide range of neonatal, pediatric and adolescent conditions. Our physicians are all fellowship-trained pediatric surgeon specialists who are solely devoted to the care of such conditions. Additionally, patient care is coordinated with other fellowship-trained pediatric specialists to ensure the best and most up-to-date care available.

Our physicians are involved in the teaching and training of other physicians. Our physicians evaluate and treat conditions ranging from the simple to the complex including:

- Neonatal Surgery
- ECMO
- Endoscopy
- Burn Treatment
- Adolescent Bariatric Surgery
- Cancer Surgery
- Non-Cardiac Thoracic Surgery
- Laparoscopic Surgery
- Trauma

Gynecology provides screening for sexually transmitted diseases and cervical cancer. We assist with management of abnormal menstrual cycles, contraception, abnormal pap smears and pelvic pain.

Gynecology offers medical and minimally invasive surgical management options for treatment of benign gynecologic masses.

**Physician:**
Kim Hoover, M.D.
Assistant Professor
Department of Women's Reproductive Services - UAB
The Division of Pediatric Hematology and Oncology is a component of the UAB Department of Pediatrics and the UAB Comprehensive Cancer Center. The Division’s programs are housed in The Center for Childhood Cancer and Blood Diseases at the Children’s Hospital of Alabama. Most children with cancer and blood diseases treated in Alabama receive their care at Children’s Hospital.

Specific services include:

**Pediatric Oncology**
- All forms of Childhood Cancer
- The division is a member of the Children's Oncology Group

**Pediatric Hematology**
- Sickle Cell Disease and other hemoglobin defects
- Hemophilia and other bleeding disorders
- Includes a federally-recognized comprehensive hemophilia clinic
- Rare defects of platelets, white blood cells and other blood disorders

**Neuro-Oncology**
- State-of-the-art treatment for brain and spinal cord tumors with individualized patient care plans
- Extensive participation in clinic research studies including Children's Oncology Group, Neurofibromatosis Consortium and industry-sponsored protocols
- Close collaboration with UAB Radiation Oncology including 3D Conformal and Gamma Knife Therapy

**Pediatric Blood and Marrow Transplantation Program**
- Member of the Pediatric Blood and Marrow Transplant Consortium
- Member of the Stem Cell Institute of UAB
- Expertise in cord blood transplants
- Transplants for these diseases: leukemia, marrow failure disorders, solid tumors and immune deficiencies

**Pediatric Developmental Therapeutics Program**
- Member of Children’s Oncology Group Phase 1 consortium
- Member Sarcoma Alliance for research through Collaboration

Physicians in the Division of Neonatology provide comprehensive care to newborn infants using a family-centered approach, combined with state-of-the-art technology, including high frequency ventilation, nitric oxide, transcutaneous blood gas monitoring, whole body hypothermia, cardiovascular surgery, all pediatric surgeries and extracorporeal membrane oxygenation.

The Division of Neonatology is responsible for the operation of the Neonatal Intensive Care Unit (NICU) at Children's Hospital and the Regional Newborn Intensive Care Unit (RNICU) at UAB Women & Infants Center.

Our physicians accept referrals from around the state, country and other countries for conditions such as:
- Prematurity
- Genetic problems
- Hypoxic-ischemic encephalopathy
- Bronchopulmonary dysplasia
- Cardiac disorders
- Infections
- Surgical problems
- Pulmonary hypertension
- Multiple other problems

The Division of Nephrology provides comprehensive care for newborn infants, children and adolescents, using a family-centered approach combined with state-of-the-art technology. The division is one of the only hospitals to offer in-center hemodialysis, home hemodialysis and home peritoneal dialysis.

**Conditions Treated:**
- End-stage renal failure
- Fluid and electrolyte problems
- Hypertension
- Renal transplantation
- Systemic lupus erythematosus
- Nephrotic Syndrome
- Congenital Anomalies of the Kidney and Urinary Tract (CAKUT)
- Genetic kidney conditions including polycystic kidney disease
- Glomerulonephritis
- Hematuria
- Proteinuria
- Kidney Stones
- Acute renal failure

Pediatric Neurology provides inpatient consultative services at both the Children's Hospital of Alabama and UAB Hospital. In addition, the service administers and directs a four bed inpatient Epilepsy Monitoring Unit, with plans for expansion in the future. Patient diagnoses cover a range of problems including seizure disorders, neurodegenerative diseases, primary muscle diseases, developmental problems and acute encephalopathies.

The division provides ambulatory services through general pediatric neurology clinics at Children's Hospital and sleep clinics. An expanding research program is investigating basic and clinical problems related to epilepsy, child development, genetics and biochemical diseases.

**Pediatric Epilepsy Program**
The UAB Pediatric Epilepsy Program at Children's Hospital uses the latest technologies and state-of-the-art facilities to diagnose and treat seizures. Treatments include medications, diets and surgical therapy when seizures remain poorly controlled. Our epilepsy surgery program is one of the fastest growing in the nation. To advance epilepsy care, we are also actively involved in research in pharmaceutical and neuroimaging/engineering methodologies.

**CPODD**
The Center for Pediatric Onset Demyelinating Disease (CPODD) is one of six Pediatric MS Centers of Excellence nationwide established by the National Multiple Sclerosis Society (NMSS). We provide comprehensive multi-disciplinary care for children and teens with MS and other CNS demyelinating diseases, up-to-date, accurate information about MS and related disorders to patients and families, schools, health care providers and the public at large. We also conduct extensive research in the field of demyelinating diseases.

The Children’s Hospital Palliative Care team is a specially trained team that provides comfort care for children and their families with chronic, advanced, life-limiting or life threatening illnesses.

Our team is designed to work as a consult service with other physicians to support inpatients and their loved ones through these difficult times. We focus on all levels of suffering including the physical, social, emotional and spiritual. We strive to make everyday better for our patients.

Services Offered:
- Symptom control
- Pain management
- Emotional and spiritual support
- Nutritional guidance
- Counseling
- Social help
- Grief counseling
- Help setting health care goals
- Educational programs
- End-of life planning
- Promote Comfort
- Treatment of all 4 domains of suffering
- End of life care

The Division of Pediatric Rehabilitation Medicine utilizes an interdisciplinary approach to address the prevention, diagnosis, treatment and management of congenital and childhood onset physical impairments, including related or secondary medical, physical, functional, psychosocial, cognitive and vocational limitations or conditions, with an understanding of the life course of disability. Commonly treated conditions include cerebral palsy, spina bifida, muscular dystrophy, brachial plexus injury and limb deficiency, among others.

In addition to its comprehensive outpatient services, the division is home to the only acute pediatric inpatient rehabilitation service in the state, providing services for children and adolescents with acquired brain injuries, spinal cord injuries, brain tumors, strokes and other disabling illnesses or injuries.

**Outpatient Services Include:**
- Brachial Plexus Clinic  Appt. (205) 939-9653
- General Rehabilitation Clinic  Appt. (205) 939-9141
- Hospital Follow-Up Clinic  Appt. (205) 939-9790 (Option#0)
