Dear Colleague,

We are pleased to provide you with the 2014 Directory of Pediatric Services. Within its pages are the names and contact information for some of the brightest minds and most compassionate hearts in pediatric medicine. Please replace any older versions of the Directory with this one. You can also find the most up-to-date directory and other resources for referring physicians on the Healthcare Professional section of www.ChildrensAL.org.

Last year was certainly one of change and accomplishment for Children’s of Alabama. We spent our first full year in the new the Benjamin Russell Hospital for Children and as we moved in, we immediately turned our attention to operations inside this amazing facility and to improving the medical care and processes to benefit our young patients. Of particular note were the move from UAB of the Pediatric Transplant Program, which is now certified as a stand-alone center at Children’s, and the achievement of Gold Status for LEED Certification by the Russell building.

Renovations continued on the 7th floor of the Dearth Tower. There was substantial work on new clinic space in the “old” Emergency Department area and the readying of new inpatient and outpatient space on the fourth floor of the Dearth Tower for Psychiatric Services.

A number of our services were recognized again in 2013 by US News & World Report as being among the top pediatric programs in the nation. Importantly, Children’s successfully completed a Joint Commission survey for reaccreditation for another three years.

I mention these accomplishments here to point out that while our new building is exciting, it is what goes on inside that building and all of our facilities that is most important. Thank you for all you do to help prevent, treat and put an end to pediatric injury and disease.

Very truly yours,

Wm. Michael Warren, Jr.
President and CEO
This publication is intended to be a quick reference for referring physicians and their staffs, providing a general overview of Children’s of Alabama and its specialty care and support services on campus. This directory is not a comprehensive medical staff directory.

This information and more is also available on our website, www.ChildrensAL.org. Many physicians in private practice have privileges at Children’s of Alabama and may be included on the website upon request.

The Directory of Pediatric Services is printed annually by the Children’s of Alabama Corporate Communications Department. All information has been verified and was accurate at time of printing.

Any edits or additions for future editions are welcome and can be directed to Tiffany Kaczorowski in Corporate Communications at 205.638.6916 or 205.638.6660 (main number) or via email to Tiffany.Kaczorowski@ChildrensAL.org.

Physician Link

(205) 638-7479

Physician Link is a telephone resource for referring physicians to use for any non-emergency issues or concerns.

This is also the best way for primary care physicians and office staff to receive guidance throughout the referral process and obtain general Children’s information.

Referring physicians can:
- Call Monday-Friday, 8 am-4:30 pm
- Provide general information
- Assist in patient follow-up
- Assist in physician concerns
- Resolve issues/concerns
- Help facilitate the patient referral process

Please refer to individual divisions for direct referral phone numbers.

One Stop Calling/Patient Placement

(205) 638-7200 or (205) 212-7200

One Stop Calling/Patient Placement assists referring physicians in admitting patients to Children’s of Alabama in an emergency situation.

If a child is seen by his primary care doctor and is deemed ill enough to need a bed right away, referring pediatricians should call this number to make immediate placement arrangements.

How does it work?
1. Receive call from referring physician
2. Obtain information about patient and a direct call-back number
3. Contact appropriate Children’s of Alabama physician and initiate conference call
4. If decision is made to transfer, the Patient Placement Coordinator will call referring facility with room and phone number for the nurse to call report
The Healthcare Professionals Website provides forms, directions and contact information to help facilitate the referral process. In addition, the website will reflect the latest news regarding Children's of Alabama divisions.

Our updated website offers several services:

- Resolve issues/concerns
- Help facilitate the patient referral process
- CME Opportunities
- Credentialing
- Maps and Directions
- Nursing at Children’s
- Online Pre-Registration
- One Stop Calling/Patient Placement
- Patient Referral Forms
- Physician Link
- Physician Training Resources for iConnect Acute Care
- Sign up for E-News (quarterly e-newsletter for referring offices)

The Benjamin Russell Hospital for Children is located on the block directly north of the McWane Building (formerly the main hospital) and is bridged to the existing Children’s facilities (McWane, Children’s Harbor and Children’s Park Place) and to the UAB Women and Infants Center.

Square footage of the 12-story building exceeds 760,000 square feet, making it the largest medical facility expansion in the history of Alabama. With the addition, bed licensing for Children’s has increased from 275 to 332, plus 48 NICU bassinets.

The Russell Building features larger patient rooms, a much larger emergency department and two additional general operating rooms. Two cardiac ORs dedicated to pediatric cardiovascular surgery have been relocated from UAB to the new Children’s facility.

The new facility, which opened on August 4, 2012, enabled consolidation of pediatric services with a family-centered design to enhance patient and family comfort. The building will accommodate projected growth in patient volume, as well as anticipated medical technology needs.

The building, along with the entire downtown campus, is named in honor of legendary Alabama entrepreneur Benjamin Russell (1876-1941) and to recognize the $25 million gift from his grandson, Ben Russell and Ben’s wife Luanne, both longtime hospital supporters.
In the Russell Building, the following are located:

Information Desk
Admitting/Discharge (2nd Floor/Main Street; 7 am-12 midnight)

**Bruno Pediatric Heart Center** (4th Floor)
- Cath Labs
- Patient beds
- Interventional Radiology Lab
- Operating Rooms
- Pre-Op/PACU

Emergency Department (1st Floor)
Gift Shop (2nd Floor/Main Street)

**Harbert Tower**
- Patient beds (6th-10th Floors)
- Helipad (14th Floor)
- Imaging (1st Floor)

**Laboratory/Referred Testing** (2nd Floor/Admitting)
- **DAYTIME DURING THE WEEK, Monday-Friday** (See McWane Building, page 13)
- **EVENINGS AND WEEKENDS** (in Russell Building ONLY)
  - Monday-Thursday, 7:30 pm-9 pm
  - Friday, 5 pm-9 pm
  - Saturday and Sunday, 6 am-9 pm

Market on Main (2nd Floor/Main Street)
Meditation Space (2nd Floor/Main Street)
Patient Relations (2nd Floor/Main Street)
Room of Magic (2nd Floor/Main Street)
Performance Area (2nd Floor/Main Street)

**Quarterback Club Tower**
- Critical Care Patient beds (6th and 7th Floors)
- Patient beds (8th-10th Floors)

**Russell Surgery Center** (3rd Floor)
- Operating Rooms
- Pre-Op/PACU

Parking is in the 5th Avenue Deck.
In the Lowder Building, the following are located:
Café Origins Coffee Shop (1st Floor)
**Lowder Surgery Center** (2nd Floor/Main Street)
  - APASS (Anesthesia Pre-Admit Screening Service)
  - Operating Rooms
  - Outpatient Surgery
  - Pre-Op/PACU

**Outpatient Clinics**
Children’s Behavioral Health (5th Floor; moving to McWane Building, 4th Floor, June 2014)
Sports Medicine (4th Floor)

Parking is in the 7th Avenue Deck.
McWane Building

In the McWane Building, the following are located:
Information Desk
Cafeteria (1st Floor)
Chapel (1st Floor)
**Dearth Tower (5th – 7th Floors)**
- Patient beds
- Dialysis (2nd Floor)
- Imaging (Outpatient) (2nd Floor)
**Laboratory/Referred Testing** (2nd Floor/Main Street)
- Monday-Thursday, 6 am- 7 pm
- Friday, 6 am-5 pm
- AFTER HOURS AND WEEKENDS (See Russell Building, page 11)
Lactation Center (Ground Floor)
**Outpatient Clinics**
- Clinics 1-10 (1st Floor)
- Clinic 11 (2nd Floor/Main Street)
- Clinic 12 (2nd Floor/One Day Surgery area)
- Clinics 14 & 15 (Ground Floor)

Parking is in the 7th Avenue Deck.
At Children’s on 3rd, the following are located:
Audiology
HEAR Center
Occupational Therapy (OT)
Physical Therapy (PT)
Speech-Language Pathology

Parking is on site.
At Children's Park Place, the following are located:

4th Avenue South Entrance:
- Allergy and Immunology Clinic
- Endocrinology and Diabetes Clinics
- Infusion Clinic
- IT (Information Technology) Training Rooms (Mezzanine Floor)
- Rheumatology Clinic
- UAB Primary Care Clinic

5th Avenue South Entrance:
- Adolescent Health Center
- CHIPS

Parking is in the 5th Avenue Deck.
Children's South Pediatric Outpatient Center

The Children’s South Pediatric Outpatient Center serves patients from newborn to 21 years of age. It is located off Interstate 459 and Acton Road south of Birmingham.

Children’s South provides another location for Children’s renowned outpatient surgery services, Pediatric Imaging Center, laboratory services, specialty care clinics and After Hours (formerly the After Hours Pediatric Center in Vestavia Hills) care. (For more on After Hours, please see page 18.)

The Outpatient Surgery Center performs more than 7,000 surgeries per year on patients 3 months to 19 years of age. In addition to its surgeons, the Center is staffed by experienced, pediatric perioperative nurses, as well as board-certified pediatric anesthesiologists and CRNAs.
Children’s South Specialty Clinics have the capacity to accommodate 30,000-40,000 specialty visits per year for services including:

- Allergy/Immunology
- Audiology
- Bariatric Surgery
- Dermatology (at Children’s South ONLY)
- Gastroenterology
- Imaging (PIC - Pediatric Imaging Center)
- International Adoption Clinic
- Neurology
- Neurosurgery
- Ophthalmology
- Orthopedics
- Otolaryngology (Pediatric ENT Associates)
- Physical and Occupational Therapy (in specified clinics only)
- Plastic Surgery
- Pulmonary
- Rehabilitation Medicine
- Rheumatology
- Sports Medicine
- Urology
- Weight Management
The Children’s South After Hours clinic is a referral clinic. We ARE NOT A WALK-IN CLINIC. After Hours does not take the place of the Primary Care Pediatrician (PCP). We require a referral from either the PCP’s office OR from a PHIL nurse (Pediatric Health Information Line) who will notify the PCPs that a patient was referred to After Hours.

The clinic sees patients as follows:
1. Patient is unable to see the regular physician during the day
2. Patient has a minor emergency during hours when the physician’s office is closed
3. PCP or PHIL nurse calls or faxes referral to After Hours.
4. Parent makes an appointment, as long as the PCP has been contacted and the referral is on its way.
5. Patients who require more emergent or advanced care or require admission to the hospital will be transferred to Children’s Russell Campus downtown.

---

**Hours of Operation**
Monday-Friday, 5-10 pm  
(Last appointment at 9:30 pm)  
Saturday-Sunday, 12-8 pm  
(Last appointment at 7:30 pm)
After Hours at Children's South continued...

Tips for the Primary Care Office:

**Scenario #1:**
Doctor’s office is open, however all appointments are booked.
Solution:
Explain to parent that After Hours Clinic accepts appointments from 5–9:30, Monday-Friday, and 12–7:30, Saturday and Sunday. Office nurse calls or faxes referral.
Parent calls and requests appointment time.

**Scenario #2:**
Doctor’s office is closed, but is contracted with PHIL to take calls.
Solution:
Parent leaves a message with PHIL and an on-call nurse calls parent back.
PHIL nurse notifies After Hours Clinic that patient will be coming in and sends referral.
Parent calls to request appointment time.

**Scenario #3:**
Doctor’s office is open, but child’s condition is urgent or needs a higher level of care.
Solution:
Send parent/child to the Emergency Department
Regional Outreach Clinics

**Huntsville**
The North Alabama Sickle Cell Clinic meets at 301 Governor’s Drive, Huntsville, Alabama 35801. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other Hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

See page 22 for North Alabama Children’s Specialists.

**Montgomery**
The Nephrology and Hypertension Clinic meets from 8:30 am-3 pm on the second Friday of each month at Physicians to Children. Call (205) 638-9781 for scheduling. Rheumatology also holds clinics in Montgomery. Call (205) 638-9438 for scheduling.

The Sickle Cell Clinic meets at the Morrow Medical Tower of Baptist Medical Center South, 2055 East South Boulevard, Suite 202, Montgomery, Alabama 36116. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other Hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

**Opelika**
The Sickle Cell Clinic meets at The East Alabama Medical Center Prenatal Clinic, 2000 Waverly Parkway, Opelika, Alabama 36801. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other Hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

**Tuscaloosa**
The Sickle Cell Clinic meets at The Capstone Medical Center 700 University Boulevard East, Tuscaloosa, Alabama 35401. Call Stacy Smith at (205) 638-9285 for scheduling. To inquire about other Hematology clinics near your area, please call Stacy Smith at (205) 638-9285.

Our clinic also offers
Nutrition Therapy services.
The William A. Daniel, Jr. Adolescent Health Center provides primary and subspecialty care to adolescents. Care is provided by a team of health professionals (physicians, psychologists, nutritionists, nurses and social workers) specially trained to handle the unique problems of adolescents.

Services include:
- Adolescent Clinic, a primary care clinic for adolescents 11-21
- Eating Disorders Clinic that specializes in medical and nutrition care for adolescents with disordered eating
- Adolescent Nutrition Clinic that provides nutrition counseling for a variety of nutritional concerns
- LEAH (Leadership Education in Adolescent Health), an interdisciplinary clinic for adolescents with complex health problems
- Consultative Services available in Adolescent Clinic and for adolescents who are hospitalized
- Reproductive Health Services
- Sports Physicals

**Physicians/Health Professionals:**

Marsha Sturdevant, MD

Assistant Professor
Medical Director, Children’s Center for Weight Management (page 25)

Bonnie Spear, PhD, RD
Professor and Faculty Dietitian/Nutritionist
Director, Adolescent Nutrition Clinic
Co-Director, Eating Disorders Clinic
Director, LEAH Training Program

Other faculty include:
Wesley Childs, PhD, MSW
Social Worker

Glenda Smith, PhD, RNC, PNP-BC
Nurse Practitioner
Weight Management

The Children’s Center for Weight Management (CCWM) uses a team approach to help Alabama youth achieve a healthier weight. Our objective is to evaluate overweight and obese youth for weight-related medical conditions and promote healthy weight change with family-specific lifestyle changes. Other interventions for weight loss, such as medications and surgery, also may be discussed. Each family receives multidisciplinary evaluation by our team, which includes a pediatrician, nurses, nurse practitioner, psychologist, registered dietician and a physical therapist.

Our services include:
- Multidisciplinary evaluation to develop a family behavioral plan
- Adolescent bariatric surgery consultation and evaluation
- Camp SHINE (Support, Help, Instruction in Nutrition and Exercise), weeklong summer camp for ages 12-15
- Healthier Weigh, weekly program for ages 13-18

Other weight management services handled through the Children’s of Alabama Nutrition Department include:
- LESTER Program, weekly program for ages 8-12
- Nutrition (RD) Only Consultation

Physicians/Health Professionals:
Stephenie Wallace, MD, MSPH
Assistant Professor, Adolescent Medicine
Medical Director, CCWM

Mike Chen, MD
Chief of Pediatric Surgery

Karen McCarty, PhD, CRNP
Pediatric Nurse Practitioner

Kelly Saunders, MS, RD
Nutrition Services

Connie Cushing, PT, DPT
Andrew Wolverton, PT, DPT
Chantel M. Jones, PT, DPT
Physical Therapy

Beverly Haynes, RN
Bariatric Surgery
Board-certified subspecialists in the Division of Pediatric Allergy, Asthma and Immunology specialize in the diagnosis and treatment of children with allergic and immunologic diseases. Allergic disorders diagnosed and treated by division physicians include allergic rhinoconjunctivitis (hay fever), allergic and nonallergic asthma, urticaria (hives), angioedema (swelling disorders), atopic dermatitis (eczema) and allergies to foods, stinging insects and medications. Division physicians also specialize in the diagnosis and treatment of hereditary immune deficiencies (Primary Immune Deficiencies).

We are Alabama’s only all-pediatric allergy group. Our main campus clinic is located in Children’s Park Place and offers next-day appointments and free, convenient parking. Dr. Suthida Kankirawatana also sees patients at Children’s South, 1940 Elmer J. Bissell Road, Birmingham, AL 35243.

The Joseph S. Bruno Pediatric Heart Center located in the Benjamin Russell Hospital for Children links with the adult congenital heart surgery facilities at UAB. The two are connected by the Women & Infants Center, which allows easy access to the Pediatric Cardiology Clinic, as well as UAB’s high-risk obstetric birthing suites and regional neonatal intensive care unit. We now provide a unique single platform continuum of care for fetal, neonatal, pediatric and adult patients with congenital heart disease.

Services offered:
- Complex repair of pediatric congenital heart disease
- Minimally invasive pediatric cardiac surgery
- Acquired heart disease
- Advanced heart failure
- Ventricular Assist Device implantation and management
- Cardiac transplantation
- Pulmonary hypertension
- Fetal cardiology
- Electrocardiograms
- Echocardiography
- Exercise testing
- Cardiac CT angiography
- Cardiac MRI
- Cineangiography
- Catheterization laboratories (includes interventional catheterizations)
- Cardiac Electrophysiology
- Three-dimensional electrophysiologic mapping, which minimizes radiation
- Hybrid catheterization lab (both a cath lab and surgical suite)
- Dedicated same day and post-anesthesia care unit
- Heart specific operating rooms
- State-of-the-art 20-room CICU (intensive care unit for heart patients)
- ECMO suites (four dedicated to pediatric heart/lung bypass treatment)
- Easy access to the UAB high-risk obstetric birthing suites and regional neonatal intensive care unit

Pediatric Critical Care Medicine provides services to patients with medical and surgical conditions such as respiratory failure, shock, seizures, traumatic injuries, meningitis and other life-threatening diseases. The Pediatric Critical Care Division provides this care for children in the Pediatric Intensive Care and Cardiovascular Intensive Care Units at Children’s of Alabama in the Russell Building.

Special support modalities include: CVVH, ECMO and high-frequency ventilation. Special research interests include: congenital heart disease, lung injury, traumatic brain injury, sedation, shock, cardiopulmonary bypass, simulation and patient safety.

The division also offers a sedation service for children undergoing painful procedures or therapy. The division also provides medical direction for the pediatric critical care transport team who transport critically-ill children via ground or air transport.

The Children’s of Alabama Dental Clinic is a teaching clinic where, in association with the University of Alabama School of Dentistry, dentists receive training to become specialists in Pediatric Dentistry. This clinic provides comprehensive dental healthcare to children younger than age 15 and provides emergency dental services and dental treatment to children with special needs and/or physical challenges, as well as those who are medically compromised. All care is overseen by board-certified pediatric dentists on the faculty of the UAB Department of Pediatric Dentistry.

The Department of Pediatric Dentistry’s faculty also see private patients in the UAB Dental Group’s Pediatric Faculty Practice. This clinic offers care delivered directly by the faculty in a private practice model. Days of operation, services provided and ages accepted are specified by each dentist and can be provided upon request.

Services provided:
- Oral hygiene care and education
- Dental Restorations
- Extractions
- Pulp Therapy
- Treatment of trauma, including placement of sutures and splints
- Minimal Oral Sedation
- Dental treatment under general anesthesia

Emergency services are available through the emergency room for trauma emergencies after hours.

The Division of Pediatric Endocrinology at Children’s of Alabama provides comprehensive multidisciplinary evaluation and management of children with diseases of the endocrine system.

The Endocrinology faculty is comprised of certified nurse practitioners and fellowship-trained physicians. The Pediatric Diabetes Center is an ADA recognized diabetes self-management training center.

Specific services include but are not limited to:
- Adrenal gland disorders
- Abnormalities of bone metabolism
- Calcium disorders
- Carbohydrate disorders and hypoglycemia
- Diabetes – type 1, type 2 and insulin pump therapy
- Disorders of puberty
- Growth problems
- Lipid disorders in children
- Newborn screening for thyroid and adrenal disorders
- Pituitary gland disorders
- Thyroid disorders
- Water and electrolyte disorders

The Division of Pediatric Surgery offers comprehensive general and specialized surgical treatment of a wide range of neonatal, pediatric and adolescent conditions. Our physicians are fellowship-trained pediatric surgery specialists who coordinate with other fellowship-trained pediatric specialists including pediatric anesthesiologists to ensure the best and most up-to-date care available. We use advanced laparoscopic and thoracoscopic techniques in many of the procedures to minimize pain, speed recovery and reduce scarring.

Our physicians evaluate and treat conditions ranging from the simple to the complex including:

- Hernias and Undescended Testes
- Neonatal Surgery
- Cancer Surgery
- Venous Access
- Feeding Tube Access
- Disorders of the Biliary System
- ECMO
- Trauma and Burns
- Adolescent Bariatric Surgery
- Thoracic Surgery
- Laparoscopic and Thoracoscopic Procedures

Children’s of Alabama and UAB have a dedicated division of Pediatric and Adolescent Gynecology providing compassionate care for girls of all ages. In addition to providing routine gynecologic care, specialists within our hospital can help young women in many other areas. This includes counseling and education on contraceptive options including oral, transdermal, subcutaneous, injectable contraception and intrauterine devices. Evaluation and management of menstrual irregularity, benign disorders of genital tract and ovaries, vaginal dermatoses and confidential testing for sexually transmitted infections are also available for these young women.

The Alabama Center for Childhood Cancer and Blood Disorders is a partnership between Children’s of Alabama, and the UAB Division of Pediatric Hematology and Oncology. More than a dozen highly-specialized pediatric hematologists, oncologists and blood and marrow transplant physicians at Children’s provide care to infants through young adults up to age 25. Our multidisciplinary team approach provides family-centered treatment and support through a variety of innovative services from the day of diagnosis through treatment, cure and long-term follow-up.

Specific services include:

**Pediatric Oncology**
- All forms of Childhood Cancer
- The division is a member of the Children’s Oncology Group

**Pediatric Hematology**
- Sickle Cell Disease and other hemoglobin defects
- Hemophilia and other bleeding disorders
- Includes a federally-recognized comprehensive hemophilia clinic
- Rare defects of platelets, white blood cells and other blood disorders

**Neuro-Oncology**
- State-of-the-art treatment for brain and spinal cord tumors with individualized patient care plans
- Extensive participation in clinic research studies including Children’s Oncology Group, Neurofibromatosis Consortium and industry-sponsored protocols
- Close collaboration with UAB Radiation Oncology including 3D Conformal and Gamma Knife Therapy

Pediatric Hospital Medicine is led by Dr. Robert Pass and includes seven additional physician faculty members and three fellows (with four more doctors scheduled to join the staff this July). Pediatric Hospital Medicine offices are located on the first floor of the McWane Building, Suite 108.

Physicians in Pediatric Hospital Medicine provide care to patients hospitalized on the general inpatient service at Children’s of Alabama, organize faculty staffing for five or six inpatient teams 24 hours per day and coordinate inpatient care with primary care or specialty physicians who follow patients after hospital discharge.

Faculty members are responsible for teaching and supervising resident physicians. In addition, they instruct medical students and assist in the development of the medical student curriculum for inpatient pediatrics. Pediatric Hospital Medicine also trains hospitalists; a two-year fellowship program was started in 2012.

Research activities of Pediatric Hospital Medicine are aimed at developing clinical pathways for specific conditions, measuring and improving quality of care and measuring physician performance.

More information on Pediatric Hospital Medicine at Children’s of Alabama is available at http://www.uab.edu/medicine/peds/hospitalmed.

Interventional Radiology (IR) is a sub-specialty of Diagnostic Radiology that has become an integral part of comprehensive patient care, providing less invasive techniques for the diagnosis and treatment of a broad range of health problems. Our group uses cutting edge interventional devices and state-of-the-art imaging equipment to perform a variety of innovative interventional procedures for treatment of several diseases.

Procedures
Interventional Radiology offers a full spectrum of procedures, often performed on an outpatient basis, including:

- Embolization of vascular malformations
- Angiography, Angioplasty and Stenting
- Transarterial Chemoembolization (TACE)
- Radioembolization of Liver Tumors
- Ablation of Solid Tumors
- Ablation of Liver Tumors
- Ablation of Spine and Other Bone Tumors
- Biliary Interventions including PTC, PTD, Plastic Stents and Stone Removal
- Central Venous Access Catheter Placement and Management
- Dialysis-Related Interventions, including Fistulogram and Declot of Dialysis Graft
- Gastrostomy and Gastrojejunostomy
- Inferior Vena Cava Filter Placement and Removal
- Spine Augmentations, including Vertebroplasty and Kyphoplasty
- Urologic Interventions using Nephrostomy, Nephroureterostomy and Ureteral Stent Placement and Retrieval
- Percutaneous Abscess Drainage
- Venous Interventions including Angioplasty and Stenting
• Arterial and Venous Thrombolysis
• Transjugular Intrahepatic Portosystemic Shunts (TIPS)
• Embolization of upper and lower gastrointestinal bleeds
• Ovarian Vein and Varicocele Embolization
• Adrenal venous sampling and other venous sampling
• WADA test

Physicians in the Division of Neonatology provide comprehensive care to newborn infants using a family-centered approach, combined with state-of-the-art technology, including high frequency ventilation, nitric oxide, transcutaneous blood gas monitoring, whole body hypothermia, cardiovascular surgery, all pediatric surgeries and extracorporeal membrane oxygenation. The Division of Neonatology is responsible for the operation of the Neonatal Intensive Care Unit (NICU) at Children’s of Alabama and the Regional Newborn Intensive Care Unit (RNICU) at UAB Women and Infants Center. Continuity of care between the two units is facilitated by three bridges between the UAB Women and Infants Center and the Russell Building at Children’s of Alabama. Our physicians accept referrals from around the state, country and other countries for conditions such as:

- Prematurity
- Infections
- Hypoxic-ischemic encephalopathy
- Pulmonary hypertension
- Bronchopulmonary dysplasia
- Multiple other problems
- Cardiac disorders
- Genetic problems
- Surgical problems

The Division of Nephrology provides comprehensive care for newborn infants, children and adolescents, using a family-centered approach combined with state-of-the-art technology. The division is the only service in Alabama to offer in-center hemodialysis, home hemodialysis, home peritoneal dialysis, plasmapheresis and renal transplantation to pediatric patients.

Conditions treated:
- End-stage renal failure
- Glomerulonephritis
- Enuresis
- Fluid and electrolyte problems
- Hematuria
- Hypertension
- Proteinuria
- Renal transplantation
- Kidney stones
- Systemic lupus erythematosus
- Acute renal failure
- Nephrotic Syndrome
- Recurrent urinary tract infections
- Renal Tubular Acidosis
- Congenital Anomalies of the Kidney and Urinary Tract (CAKUT)
- Genetic kidney conditions including polycystic kidney disease

Pediatric Neurology provides inpatient consultative services at both Children’s of Alabama and UAB Hospital. Our Epilepsy Monitoring Unit is designated Level 4 by the National Association of Epilepsy Centers (NAEC), which is the highest level for units specializing in a continuum of care for patients; from seizure evaluations, to seizure treatment plans. Patient diagnoses covers a range of problems including seizure disorders, neurodegenerative diseases, primary muscle diseases, developmental problems and acute encephalopathies.

The division provides ambulatory services through general pediatric neurology clinics at Children’s of Alabama. An expanding research program is investigating basic and clinical problems related to epilepsy, child development, genetics and biochemical diseases.

**Pediatric Epilepsy Program**

Our Level 4 Epilepsy Monitoring Unit is state-of-the-art, child friendly and accommodates up to 10 patients daily. Treatments for seizures include medications, dietary therapies and surgical interventions when seizures remain poorly controlled. Our epilepsy surgery program is one of the fastest growing in the nation. To advance epilepsy care, we are also actively involved in research in pharmaceutical and neuroimaging/engineering methodologies.
Neurology continued ...  

**CPODD**
The Center for Pediatric Onset Demyelinating Disease (CPODD) is one of six Pediatric MS Centers of Excellence nationwide established by the National Multiple Sclerosis Society (NMSS). We provide comprehensive multi-disciplinary care for children and teens with MS and other CNS demyelinating diseases, up-to-date, accurate information about MS and related disorders to patients and families, schools, health care providers and the public at large. We also conduct extensive research in the field of demyelinating diseases.

The Children’s of Alabama Palliative and Supportive Care Team is a specially trained interdisciplinary team that provides care for children and their families with complex, chronic or life-threatening illnesses. We are focused on providing patients relief from pain, symptoms (for example, shortness of breath or nausea) and the stress of serious illness – whatever the diagnosis.

Our team includes doctors, nurses and other specialists (pastoral care, psychology, social work, child life and physical therapy) who partner with the patient’s physicians to provide an extra layer of support. The goal of the Palliative and Supportive Care Team is to improve the quality of life for both the patient and family.

Palliative and supportive care is appropriate at any age and at any stage in a serious illness and can be provided together with curative treatment. Our interdisciplinary team works in collaboration with the primary team to address physical, emotional, psychological, practical and spiritual issues which may contribute to suffering or interfere with healing. We strive to make every day better for our patients and their families, to promote healing, comfort and hope, no matter what the outcome may be.
Palliative and Supportive Care continued ...

Indications for a Palliative and Supportive Care Consult:
- Pain and symptom management in patients with serious illness
- Negotiating goals of treatment
- Care coordination in patients with serious illness
- Family support for patients with serious illness
- End-of-life decision making and symptom management
- Hospice care referrals and coordination

The Division of Pulmonary and Sleep Medicine specializes in the treatment of patients with a variety of lung disorders including asthma, bronchopulmonary dysplasia (BPD), cystic fibrosis (CF), pneumonias, sleep disorders, lung problems related to neuromuscular disorders and ventilator-dependence. We are committed to family centered care, and work with a variety of support services such as nutrition, social work, speech pathology, respiratory therapy and psychology, among others. Our group is committed to advancing the understanding of respiratory diseases through basic, translational and clinical research. Our division is actively involved in clinical research projects, including development of new therapies for cystic fibrosis, neuromuscular disorders, sleep disturbances in children and outcomes research in asthma and cystic fibrosis.

Areas of Expertise
Our team evaluates and treats a range of conditions, including:

- Asthma
- Aerodigestive disorders in collaboration with Gastroenterology and Otolaryngology Divisions
- Premature lung disease and bronchopulmonary dysplasia
- Cystic Fibrosis
- General Pulmonary Program (including urgent referrals)
- Home Ventilator and Technology Dependence
- Neuromuscular disorders (MDA Clinic)
- Respiratory infections and pneumonia
- Sleep-disordered breathing (including behavioral sleep disorders and CPAP/BiPAP management)

The Division of Pediatric Rehabilitation Medicine utilizes an interdisciplinary approach to address the prevention, diagnosis, treatment and management of congenital and childhood onset physical impairments, including related or secondary medical, physical, functional, psychosocial, cognitive and vocational limitations or conditions, with an understanding of the life course of disability. Commonly treated conditions include cerebral palsy, spina bifida, muscular dystrophy and brachial plexus injury, among others.

In addition to its comprehensive outpatient services, the division is home to the only acute pediatric inpatient rehabilitation service in the state, providing services for children and adolescents with acquired brain injuries, spinal cord injuries, brain tumors, strokes and other disabling illnesses or injuries.

Outpatient Services include:
- Brachial Plexus Clinic (205) 638-9653
- General Rehabilitation Clinic (205) 638-9790
- Hospital Follow-Up Clinic (205) 638-6997
- Intrathecal Baclofen Pump Management (205) 638-9941
- Movement Disorder/Spasticity Clinic (205) 638-9790

Pediatric Rheumatology offers comprehensive diagnostic and therapeutic services for juvenile rheumatic disorders, including arthritis, lupus, myositis, Sjogren syndrome, vasculitis, sarcoidosis, scleroderma and other related systemic autoimmune and musculoskeletal disorders. In addition, an intravenous infusion suite is available for the administration of targeted biologic agents and broader range immunosuppressive therapies.

New for 2014 are specialty-specific clinics for patients with Juvenile Spondyloarthritis and Juvenile Lupus. In addition to providing outstanding patient care by expert clinicians, these clinics also offer patients and families the opportunity to participate in disease-related National Institutes of Health- and foundation-funded research programs garnered by pediatric rheumatologists at Children’s of Alabama and the University of Alabama at Birmingham.

UAB Sports Medicine at Children’s of Alabama provides a full array of orthopedic services and expertise. The major objectives of this specialty are the diagnosis, treatment and rehabilitation of sports-related injuries. Sports Medicine also provides services to the Concussion Clinic at Children’s of Alabama. The clinic was established to provide evaluation, treatment and medical clearance for “return to play” for youth and teenage athletes in our community. In addition, Sports Medicine works with the Alabama sports community to educate parents, athletic trainers, coaches and athletic directors about the prevention, diagnosis and treatment of concussions in youth athletes.

Surgical Services include:
- Reconstruction of Anterior Cruciate and Posterior Cruciate Ligaments
- Rotator Cuff Repair
- Bankart and Superior Labrum Anterior to Posterior (SLAP) Lesion Repair
- Additional Arthroscopies of the Knee, Shoulder, Hip and Ankle

Travel I-20/59 South on Hwy 280/31 - Elton B. Stephens Expressway/Red Mountain Expressway. Travel approximately two miles and take the 3rd/4th Avenue South exit. At end of ramp, turn right and take the first left on to Third Avenue South (one way street). Travel approximately eight blocks to 18th Street South and turn left. Travel four blocks and turn right on 7th Avenue South. Travel approximately two blocks. The 7th Avenue Parking Deck is located on the left. The McWane and Lowder Buildings are on the right, located across the street from the parking deck.
**Campus Map**

Please feel free to make copies of this map to assist your patients who are being referred to Children’s of Alabama.

**Wayfinding**

We use colors, numbers and graphics to help with wayfinding. Each floor is associated with a color, number and special theme on the elevators and signage. The 7th floor in the Quarterback Tower, for example, has a football theme, the color is green and the number is 7.

The main corridor of the expanded hospital is the second floor, called “Main Street.” From that floor patients and visitors can reach the existing hospital building, which houses patient rooms and offices. A wavy blue “river” runs through the public areas of the new facility to assist with wayfinding.

A large red ball in the terrazzo flooring is used throughout the facility to indicate locations where patients and families can obtain information — at information desks and nursing stations, for example. The circle mimics Children’s red ball logo.
